

## The right solution for onboard diagnostics

SAE J1979, SAE J1939 and ISO 27145

### OBJECTIVE: 100% OBD COMPLIANCE

#### Key Features

- Complete OBD Scan-Tool for cars and trucks
- Auto-configuration of services and parameters
- Create snapshots in XML and TXT
- Data recording in MDF 4.0 and CSV
- Advanced J1699-3 compliance test
- Create customized diagnostic requests
- Real-time communication monitor
- Remote control by WebServices
- Drive cycle assistant

#### Advantages

- Reliable and up-to-date to OBD standards and regulations
- Outstanding customer support

### SUPPORTED

#### ECUs

Any OBD compliant ECUs

#### Regulations

OBDII, EOBD, HD-OBD, WWH-OBD

#### Standards

SAE J1979, SAE J1939, ISO 27145

#### Physical connection

CAN, K-line, Ethernet, SAE J1850

#### Interfaces

Pass-Thru, RP1210, D-PDU-API and many supplier specific

## THE RIGHT TIME FOR 100% OBD COMPLIANCE

Working with emission-related diagnostic systems is subject to the rigorous diagnostic standards OBDII, EOBD, HD-OBD, and WWH-OBD, making the compliant work very complex. Through our expertise and in close collaboration with our customers, we have identified the following challenges that affect the user:

- Unfulfilled conditions set by authorities for OBD standards
- Different tools for different standards
- Outdated, or even incorrect, regulations and standards

With these challenges in mind, we've developed a software tool offering comprehensive functionality required for testing and diagnosing any electronic control module supporting OBD standards.

› **Silver Scan-Tool™** – is used worldwide to perform reliable OBDII, EOBD, HD-OBD and WWH-OBD diagnostics.

### SILVER SCAN-TOOL™ – THE RIGHT TOOL FOR RELIABLE SOFTWARE

**Silver Scan-Tool™** has been carefully adapted to encompass stringent user requirements and the latest standards in the following fields:

Automotive

Workshops

Agriculture

Sea Vehicles

Depending on the context of use **Silver Scan-Tool™** has been designed for:

- Automation systems, testbench, dyno, manual mode
- Different working environments (e.g. office, car, workshops)
- Changing light conditions
